When to end home isolation (staying home)

- People with \textbf{COVID-19 who have stayed home (are home isolated)} can stop home isolation under the following conditions:
  - \textit{If they will not have a test} to determine if they are still contagious, they can leave home after these three things have happened:
    - They have had no fever for at least 72 hours (that is three full days of no fever without the use medicine that reduces fevers) AND
    - other symptoms have improved (for example, when their cough or shortness of breath have improved) AND
    - at least 7 days have passed since their symptoms first appeared
  - \textit{If they will be tested} to determine if they are still contagious, they can leave home after these three things have happened:
    - They no longer have a fever (without the use medicine that reduces fevers) AND
    - other symptoms have improved (for example, when their cough or shortness of breath have improved) AND
    - They received two negative tests in a row, 24 hours apart. Their doctor will follow \textbf{CDC guidelines}.
